### **New Chief EZ Liner™ Express: Big Pulling Power in a Small, Affordable Package**

**Madison, Ind. (Nov. 9, 2010)** – Chief Automotive Technologies introduces the EZ Liner™ Express collision repair system, a compact, in-bay solution for the majority of collision repair jobs, affordably priced at less than \$10,000.

“Traditional frame racks are large, expensive and absolutely necessary to correctly return vehicles with major collision damage back to pre-accident condition,” says Mike Cranfill, Chief vice president of collision. “But when a shop relies on a single rack to repair all frame damage, bottlenecks can occur, slowing cycle times and reducing profitability. Since not all collision repair jobs require a full-size rack, installing the smaller EZ Liner Express in a few bays frees up the big rack for major jobs, while at the same time improving bay productivity and profitability.”

With a constant five tons of power at the hook and lifting capacity up to 5,500 lbs, the EZ Liner Express is a versatile pulling system for reversing light hits, as well as an all-purpose service lift/workstation for improving bay ergonomics and productivity on other collision repair tasks, including dismantling, sanding and painting.

The EZ Liner Express comes complete with Chief clamps, anchors and tower. The pivoting tower attaches to the deck in 10 different locations to create a true 360-degree repair system. Its unique telescopic design means the tower can be retracted or extended in just seconds, as needed. The EZ Liner Express has a minimum footprint of just 14 feet by 17 feet, so it can fit comfortably in small, narrow bays and provide more workspace for the technician.

The EZ Liner Express is compatible with all Chief computerized measuring systems, including the Vector™, Velocity™ and VelocityMAX, which feature Chief’s exclusive vehicle measurement data.

For more information about the EZ Liner Express collision repair system, contact your local Chief distributor, call 877-644-1044 or visit [www.chiefautomotive.com](http://www.chiefautomotive.com).
