

VULCAN ADU

Adhesive Debonding Unit

BREAK THE BOND OF ADHESIVE

- Chief's Vulcan ADU can break the adhesive bond on any vehicle surface; steel, aluminum, and carbon fiber using no electromagnetic field.

- Breaks the adhesive bond between glued panels or surface
- Precise temperature control - focus on one panel layer
- Microprocessor control with color touch screen
- Air and water cooled lamp for safety and extended life
- Uses infrared lamps to output focused heat to a surface
- Calibration feature to address issues when measuring different color paint and reflectivity
- Can be used to remove molding and labels
- 5-step program available to set temperature and time for curing adhesives

**THE VULCAN ADU
 INCLUDES CART
 AND COOLING UNIT**

SPECIFICATIONS	VULCAN
Voltage	230V - 60Hz (three phase)
User Interface	Color Display Touch Screen
Cable length	4M
Adjustment	Power, Time and Temperature
LAMP	
Power Output	4.8kW
Lamp Life	5000h
Cooling System	Compressed Air and Chilled Water
Temperature Control	Pyrometer
Accessories	Temperature Calibrator Trolley 3461T
